

"Elektronio Handcrafted Vehicles"

Pantelis Zarkos
CoFounder- CTO Elektronio
Verias 3, Thessaloniki, 54625
Greece
pantelis@elektroniowheels.com

"Elektronio's" mission is to produce innovative, practical and high quality micro-mobility products, such as electric bicycles and scooters which have low energy footprint, offer comfort, safety, security and storage space in everyday urban commuting and personalised to the needs of individuals and organisations.

#reimagineyourvehicle

"Second Wave"

Theodora Patsakidou
Thessaloniki, Greece
dpatsakidou@gmail.com

"Second wave is a company that uses regenerated nylon and recycled polyester as a driver and creates practical new products using recycled resources that set an example and lead the industry towards a sustainable future.

Swimwear is the ideal product for using recycled materials as the original raw material from which they are made of are synthetic fibers.

Seconds wave's mission is to promote innovative, practical, high quality and aesthetic products that are made from recyclable synthetics fibers, putting an end to the creation of new plastic.

Ride the Second Wave!

"Armonia"

Konstantinos Vragalas
Founder and Legal Representative
Thessaloniki, Greece
vragalas.env@gmail.com

The mission of "ARMONIA" is first of all to create an advanced database from which the Management Entities will be able to derive very useful data on the waste mix they manage.

The mission is also to make blockchain technology accessible to everyone, but first of all to the public sector so that from the collection of data the way waste is managed can be improved, the 'black spots' in the process can be precisely identified and incentives for a higher recycling rate can be provided.

"Circle of Fashion"

Athina Mavrommatakis
Thessaloniki, Greece
athina.mavrommatakis@gmail.com

CIRCLE OF FASHION has two missions. The first one is to protect the environment by reducing the amount of textile waste and the second is to increase the life and use of fashion products through resale. The products will be fast fashion products, vintage clothing and clothes that will be recycled. The company is planning on selling its products through the wholesale as well as the retail distribution channels and thus making it a leader in the used clothing field.

"FLERI"

Eleftheria Moraiti
Director Manager
Thessaloniki, Greece
erimw@outlook.com

The mission of "FLERI" is to promote innovative, practical and high quality products in the field of natural pharmaceutical products derived from the utilization of agricultural residues that improve the quality of life of citizens and promote the circular economy.

"PlastiPrintTech"

Transforming Plastic
into 3D Innovation

Silvia Trifonova
Bulgaria
silvia.trifonova@hotmail.com

PlastiPrintTech is a project designed to tackle the issue of plastic pollution by transforming used plastic into material for 3D printing, creating a sustainable and circular system that benefits both the environment and local communities.

"Recycling Cigarette Butts"

A Circular Solution
for a Cleaner World

Eng. Katrin Rumenova Gurkova
Bulgaria
katrinngurkova@gmail.com

The idea holds promise in addressing the pressing issue of cigarette butt litter. By transforming this waste into a valuable resource (filler in clothes, pillows, and furniture), there is an opportunity to make a positive impact on the environment, reduce landfill waste, and promote a circular economy.

"WATER RAM"

Eng. Viktoriya Georgieva Kuncheva
Sofia, Bulgaria
viktoriya.kuncheva@gmail.com

The current plan is to create a specialized unit to develop RAM pump technologies and put them into practice. One such technology is hydraulic pumps (R Ram pump or Venturo pump).
